

Purifier Mini

The **Purifier Mini** purifies the air from particles created during the DTF process, promoting a clean and safe working environment for small to mid-size DTF printing setups.

Small size, easy to replace parts and accessories, and wide compatibility with many DTF printers, ovens, and shakers were the most important qualities in mind during the MINI's development.

Features

- Compact in size
- Easy to replace the parts
- Compatible from both 110V to 220V

Benefit

- Get your working environment friendly at a low noise

Compatible with

- Phoenix Air 4050
- Seisimo 11
- All the DTF runners with similar equipment or solution

Specifications

Item No.: D.01.03.0006(110V/220V)

Voltage: 1.5A, 100V-240V

Power Consumption: 50W

Machine Weight: 5.5kg

Packing Weight: 13.5kg(2 sets)

Dimensions: Machine: 206*206*270mm

Packing: 350*350*380mm

730*370*380mm(2 sets)

Warranty: One year warranty except the consumables

Suitable Users: All desktop DTF printing users
